WORK EXPERIENCE

➤ **Backend Developer** | 03/2025 - 06/2025

Skills Divers - Jumilla, Murcia

Working in international teams using English as communication language, focused on creating innovative educational solutions and custom content management platforms.

- Development of 6+ custom plugins for Moodle and WordPress
- Implementation of RESTful APIs with Laravel
- Working with Docker, Laravel Sail and agile methodologies

FEATURED PROJECTS

➤ **EmpleaWorks - Regional Job Portal** ([Link to the website](#))

Complete job portal for the Region of Murcia with differentiated role system and mobile app. Developed with Laravel, React, Inertia, MySQL and Docker for web. React Native with Expo for mobile.

- Administrative panel for job and user management with differentiated roles. Advanced job filtering system.
- Email verification and authentication with Google OAuth2.

➤ **Script2me - AI Tools Platform** ([Link to the website](#))

Innovative solution to overcome traditional chatbot limitations in handling multiple file attachments.
Developed with Laravel, React, Inertia, Google Gemini API and Docker.

- Intelligent parsing of up to 20 simultaneous files (PDF, JS, PHP, ...)
- Options to create your prompts, refactor your code and scan for vulnerabilities.

➤ **SkillPilot - Intelligent Job Search with AI** ([Link to the website](#))

Tool that automates job offer searches across multiple portals and optimizes applications through AI. Developed with Laravel, React, Docker and custom AI agent based on Llama 3.3.

- Integration with job portal APIs for automated search based on user preferences.
- Cover letter generation and CV optimization based on each job offer.
